Acknowledgements

I would sincerely like to thank APSCH for providing me this short-term internship which helped me gain practical experience and knowledge on Data Analytics.

I would like to thank our principal sir, Dr. V. S. K. Chakravarthy for giving me this wonderful opportunity.

I would also like to thank our head of the Department Miss. Hymavathi mam, Department of BSc Computer science and our guide K. Mrudula praveena mam for being a wonderful mentor throughout my project.

I thank my lecturers, mentors and my friends who helped me to do this project. Without them this project would not have been completed.

This page content gives an idea only, which topics have to write.

1: EXECUTIVE SUMMARY

The internship report shall have a brief executive summary. It shall include five or more Learning Objectives and Outcomes achieved, a brief description of the sector of business and intern organization and summary of all the activities done by the intern during the period.

2: OVERVIEW OF THE ORGANIZATION

Suggestive contents

- A Introduction of the Organization
- B Vision, Mission, and Values of the Organization
- C Policy of the Organization, in relation to the intern role
- D Organizational Structure
- E Roles and responsibilities of the employees in which the intern is placed.
- F Performance of the Organization in terms of turnover, profits, market reach and market value.
- G Future Plans of the Organization.

3: INTERNSHIP PART

Description of the Activities/Responsibilities in the Intern Organization during Internship, which shall include - details of working conditions, weekly work schedule, equipment used, and tasks performed. This part could end by reflecting on what kind of skills the intern acquired.

CHAPTER 1: EXECUTIVE SUMMARY

Description of the sector of business & Intern Organization

Smartbridge operates in the data analytics sector providing innovative solutions to enhance business intelligence. The organization leverages power with actionable insights, enabling data-driven decision-making.

Learning Objectives and Outcomes

- 1) Understand Power BI fundamentals
- 2) Data modeling
- 3) Proficiency in Power BI tools
- 4) Data vis cleaning & transformation
- 5) Data visualization
- 6) Report design and sharing

Summary of Internship Activities:

- 1) Attending live training sessions and project-mentoring sessions.
- 2) selection of topic - "Analysis of election in India" and gathering, cleaning and analyzing its related datasets in excel.
- 3) Team formation and assignment of tasks to team members.
- 4) Designing & developing interactive dashboards, story, report on project using Power BI.
- 5) Drafting a project video demonstration and Preparation of final report.

chapter-2 : overview of the Organization

Smart Bridge is a platform that offers virtual internship to the students. The platform's goal is to prepare students for the job market by establishing a cooperative relationship between industry & Academic. Smart Bridge partners with companies such as Google to offer virtual internships. The internships provide students with hands-on experience with the latest technologies and enable project-based learning. Smart Bridge's flagship event is the "Summer internship program". The program develops students' skills in emerging technologies i.e. 1) Artificial Intelligence 2) Machine learning 3) Internet of things.

Organization's Objective:

Smart Bridge's main objective is to bridge the existing gaps between prevailing industry standards and what the academia offers to the graduates while passing out of university. Smart Bridge offers suitable skill development & training to the young talent before onboarding their first job. Their skill development programs are designed considering the present in-demand skills in the industry. We thereby work along the line to offer best programs that help

the students to gain practical knowledge and hands on train training to learn skills of their future. Therefore the main objectives of Smart bridge is providing internship for every student promote industry approved professional electives become a talent factory of India by 2026.

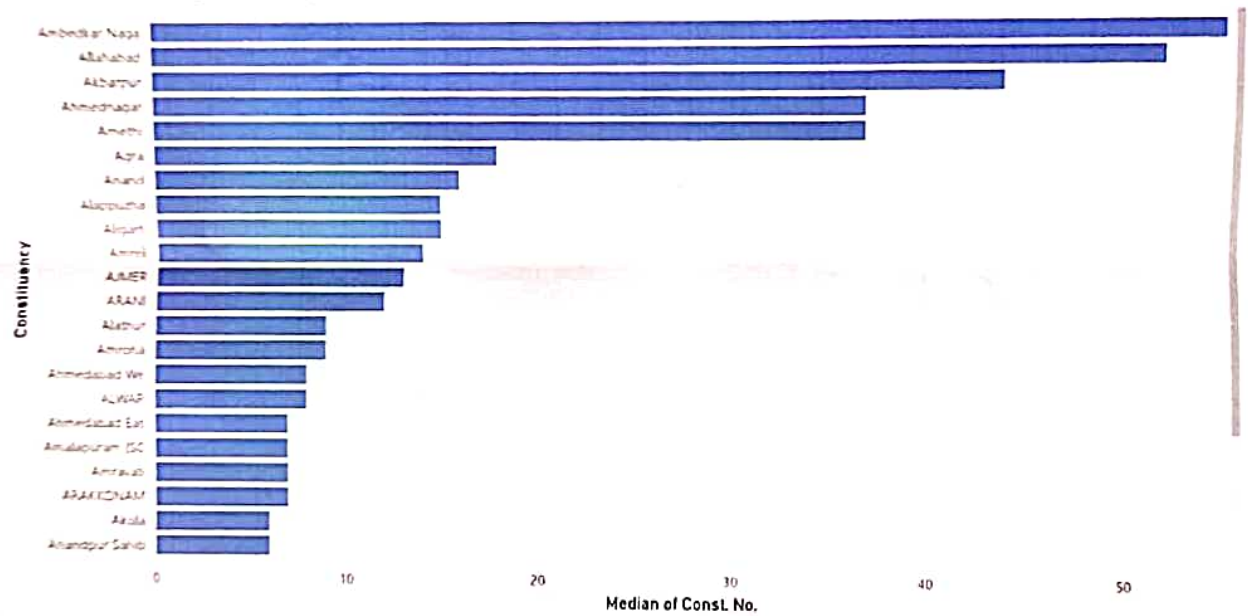

Chapter-3: Internship part

Description of the Activities / Responsibilities Undertaken

- 1) Registering the with Apsolve smart internship enrolling for Smart bridges data analytics course i.e live training sessions as per the pre-scheduled training calendar.
- 2) Participating weekly quiz & completing weekly assignment with respect to data & data analytics.
- 3) Gathering Team formation & detection of project topic - "Analysis of election in India"
- 4) Gathering, cleaning & analyzing the excel data sets of the project topic - "Analysis of election in India"
- 5) Attending Project - mentoring sessions and designing and developing interactive dashboard Report on the project topic using power BI.
- 6) web integration of above project deliverables with team's webpage using visual studio code, Drafting a project video demonstration and Preparation of final report.
- 7) Submission of team project via uploading the project files in Github Repository of the team.

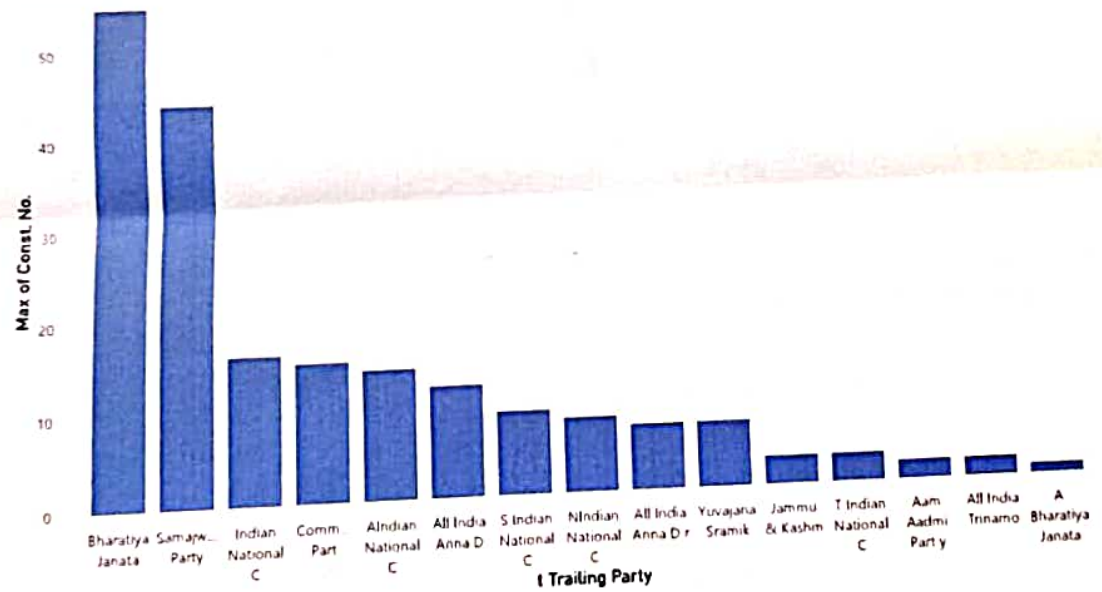

WHAT IS THE MEDIAN OF CONTITUENCY NO BY CONSTITUENCIES

ANALYSIS OF ELECTION RESULTS IN INDIA

ACTIVITY LOG FOR THE FIRST WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Introduction of data analytics	Analysis of the topic	
Day - 2	Introduction of data Analytics	Analysis of the topic	
Day - 3	Agenda and understanding customers	clear view of business problem and solutions	
Day - 4	Analysis and implementing data	Putting the data in visual form	
Day - 5	data Analytics application	learned about different tools and insights	
Day - 6	Researched the additional information online	additional information about DA.	

Objective of the Activity Done:

Detailed Report:

Data transformation and Modeling
The second week focused on data transformation and Modeling within Power BI. We learned to clean, reshape, and prepare data using power query Editor. The training covered essential functions like filtering, merging and appending dataset.

Additionally, we were introduced to data modeling concepts such as relationships, cardinality, and data hierarchies.

The practical sessions helped reinforce these concepts by allowing us to create and manage data models effectively.

ACTIVITY LOG FOR THE FIRST WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Introduction of data analytics	Analysis of the topic	
Day - 2	Introduction of data Analytics	Analysis of the topic	
Day - 3	Agenda and understanding customers	clear view of business problem and solutions	
Day - 4	Analysis and implementing data	Putting the data in visual form	
Day - 5	data Analytics application	learned about different tools and insights	
Day - 6	Researched the additional information online	additional information about DA.	

WEEKLY REPORT
WEEK - 1 (From Dt 3/1/24 to Dt 5/7/24.....)

Objective of the Activity Done: Introduction to Data Analytics and Power BI

Detailed Report: In the first week, we were introduced to the fundamentals of data analytics, emphasizing the role of data-driven decision making in Modern business. The sessions covered the basics of data analytics, Different types of data, and the importance of data visualization.

We also explored Power BI, understanding its interface, features, and how it integrates with other Microsoft products.

The week concluded with a hands-on session on loading and transforming data in Power BI.

ACTIVITY LOG FOR THE SECOND WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	data Analytics application	learned about different tools and insights	
Day - 2	Data Analytics application	where it is used in diff sec	
Day - 3	data Analytics process and steps is DA	learned about data cleaning and processing	
Day - 4	data Analytics process and steps is DA	learned about data cleaning and processing	
Day - 5	types o.f data Analytics	different types in DA in clear way	
Day - 6	Revision on given topics	Revised about DA	

Objective of the Activity Done:

Data transformation and Modeling

Detailed Report:

The second week focused on data transformation and Modeling within Power BI.

We learned to clean, reshape, and prepare data using power query Editor. The training covered essential functions like filtering, merging and appending dataset.

Additionally, we were introduced to data modeling concepts such as relationships, cardinality, and data hierarchies.

The practical sessions helped reinforce these concepts by allowing us to create and manage data models effectively.

ACTIVITY LOG FOR THE THIRD WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	business problems and the solutions	challenges faced in organisation	
Day - 2	business problems and the solutions	challenges faced in organization	
Day - 3	Power BI in Action	visible insights & sales for cost	
Day - 4	BI Architecture	learned about structure	
Day - 5	BI Architecture	learned about structure	
Day - 6	Revision on given topics.	Revised about DA	

Objective of the Activity Done:

Detailed Report:

Data Visualization Techniques
In the third week, the emphasis was on data visualization techniques using power BI.

We explored various types of charts, graphs, and maps that can be created in power BI to visualize data insights.

The sessions included best practices for selecting the right visualization based on the type of data and the message we want to convey. we also learned about Customizing visual elements, using themes, and enhancing reports with interactive features like slicers and drill-throughs.

ACTIVITY LOG FOR THE FOURTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	data to insights flow in Power BI	learned about data and model view	
Day - 2	tables and merges	learned about the kinds in merge	
Day - 3	table and merges	learned about the kinds in merge	
Day - 4	ETL tools in Power query	whilize power BI data flows	
Day - 5	ETL tools in Power query	whilize power BI data flows	
Day - 6	Reserched the additional information online	additional information about BI	

Objective of the Activity Done:

Advanced Analytics and DAX

Detailed Report:

Week four delved into advanced analytics and Data Analytics Expression (DAX) in Power BI.

We learned how to create calculated columns, measures, and custom tables using DAX. The training covered complex DAX functions such as time intelligence filtering, and aggregations.

We also explored advanced analytical techniques like trend analysis, forecasting, and what-if scenarios.

The week ended with exercises to build dynamic reports using DAX-driven insights.

ACTIVITY LOG FOR THE FIFTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	data sources dash boards and insights	learned how these are used in BI	
Day - 2	data collection and data cleaning	learned about the process in DA	
Day - 3	data collection and data cleaning	learned about the process in DA	
Day - 4	data Analytics expressions (DAX)	learned about the expression and functions	
Day - 5	data Analytics expression (DAX)	learned about the expression and functions	
Day - 6	discussion Regarding project	discussed about project.	

Objective of the Activity Done: Power BI service and Collaboration

Detailed Report: The fifth week covered the Power BI service and its Collaborations features.

We learned how to publish reports to the power BI service. share dashboards and collaborate with team members in real time. The sessions emphasized data security, row-level security (RLS), and managing workspaces.

We also explored power BI's integrations with other microsoft skills. tools. like Excel, Teams, and share point, making it easier to collaborate and share insights across the organization.

ACTIVITY LOG FOR THE SIXTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	filter functions in OAX	different filters in OAX	
Day - 2	filter functions in OAX	different filters in OAX	
Day - 3	Preparations for grand assessment test	preparation for assessment test	
Day - 4	Preparation for grand assessment test	preparation for assessment test	
Day - 5	grand assessment test	gave the grand assessment test	
Day - 6	Researched the additional information online.	additional information about BI	

Objective of the Activity Done;

Detailed Report;

Best practice and industry applications. In the final week of internship classes, we focused on best practices in data analytics and real world applications of power BI across various industries.

We discussed key strategies for optimizing data models, enhancing report performance, and maintaining data governance.

The sessions also included case studies showcasing how companies use power BI for Business intelligence, sales analytics, financial reporting, and Operational efficiency, the week wrapped up with an overview of the upcoming project work.

Objective of the Activity Done:

Detailed Report:

The seventh week marked the beginning of the project phase.

We started by defining the project scope, objectives and deliverables.

The project involved analyzing a dataset providing by smart interng. cleaning and transforming the data and building a data models.

Our team focused on identification key metrics, trends, and patterns that could drive business decisions.

The initial reports and dashboards were created to visualize these insights, using the skills and techniques learned over the past six weeks.

Objective of the Activity Done: Finalization and presentation.

Detailed Report: In the final week, we completed the project by refining our reports and dashboards, ensuring they met the project requirements.

We focused on enhancing the visual appeal and usability of the dashboards by adding interactive elements and ensuring the data was accurately represented. The week culminated with a presentation to the smart interns team, where we showcased our findings, explained the methodologies used, and demonstrated how the insights could be applied to solve data analytics.

The project was well received, marking a successful conclusion to the internship.

CHAPTER 6: OUTCOMES DESCRIPTION

Describe the work environment you have experienced (in terms of people interactions, facilities available and maintenance, clarity of job roles, protocols, procedures, processes, discipline, time management, harmonious relationships, socialization, mutual support and teamwork, motivation, space and ventilation, etc.)

Description of work environment:

The internship at Smart Bridge has been a transformation experience, equipping me with practical skill in data analytics and a deep understanding of Power BI. The hands on experience & exposure to real-world projects has not only sharpened my technical abilities but also improved my communication skills and project management skills. The work environment fostered a collaborative atmosphere with clear task-roles, well-defined protocols & structured procedures. The facilities were equipped with necessary tools for data analysis. Team members exhibited mutual support & team work, contributing to a harmonious relationship. Overall, the internship provided a well-organized comprehensive experience in data analytics and supportive work environment.

Describe the real time technical skills you have acquired (in terms of the job- related skills and hands on experience)

Description of technical skills acquired

- * Data Analysis : Proficiency in examining and interpreting complex datasets.
- * Statistical Analysis : understanding and applying statistical method to derive insights.
- * Data visualization : Mastery in creating compelling visualization for effective communication of data.
- * Programming language : Knowledge & expertise in programming language
- * Visualization generation : skills in developing interactive dashboards, comprehensive reports in Power BI.
- * Data transformation : Transforming the data using Power Query which involves data cleaning, merging, appending.
- * Performance optimization : Improving the performance of reports by optimizing data models, reducing data set size and managing relationships.
- * error handling : .. Diagnosing and fixing issues related to data refresh queries errors and visual inconsistencies.

Describe the managerial skills you have acquired (in terms of planning, leadership, team work, behaviour, workmanship, productive use of time, weekly improvement in competencies, goal setting, decision making, performance analysis, etc).

Description of managerial skills acquired:

- * Project management: coordinating tasks setting goals & ensuring the timely completion of the data analytics project.
- * Team collaboration: working efficiently in a group setting, delegating tasks & fostering a collaborative environment.
- * Leadership skills: taking initiative, guiding the team and making decisions to achieve project objectives.
- * Time management: prioritizing tasks, meeting deadlines, & efficiently allocating resources.
- * Problem solving as a team: Addressing challenges collectively & finding solutions through group discussions & collaboration.
- * Adaptability :- Being flexible adoptive to challenges in project scope on requirements.
- * Quality Assurance :- ensuring the accuracy & quality of quality of the data analytics project deliverables produced by the team.

Describe how you could improve your communication skills (in terms of improvement in oral communication, written communication, conversational abilities, confidence levels while communicating, anxiety management, understanding others, getting understood by others, extempore speech, ability to articulate the key points, closing the conversation, maintaining niceties and protocols, greeting, thanking and appreciating others, etc..)

Description of the communication skill acquired:

- * Technical Communication: effectively conveying complex data analytics concepts & findings.
- * presentation skills: creating & delivering engaging presentations to communicate insights, dashboard, visualization & Projects.
- * team collaboration: collaborating with team members to share information, discuss Project Progress & update.
- * written Communication: Crafting clear & concise reports, documentation and emails related to data analytics Processes.
- * Conflict resolution: Addressing & Resolving conflict within the team to maintain a positive & productive environment between team members.
- * feedback Delivery: providing constructive feedback to mentors and trainers and receiving feedback fostering a culture of continuous improvement.

Describe how could you could enhance your abilities in group discussions, participation in teams, contribution as a team member, leading a team/activity.

Reflecting on my experience in data analytics at Smart bridge internz, I've identified key areas for enhancing my abilities in group discussions, team participation and leadership.

To improve my contributions in group discussions, I aim to actively listen to others, ask insightful questions and share my opinions, perspectives clearly & effectively. As a team leader, I plan to strengthen collaboration by proactively offering support, leveraging my technical skills and embracing different viewpoints of team members. Lastly to enhance my leadership capabilities I plan to focus on tasking initiative creating a positive team environment and effectively coordinating team activities. Through these measure, I am comitted to continuous growth and excellence in my role within the team.

Describe the technological developments you have observed and relevant to the subject area of training (focus on digital technologies relevant to your job role)

Description of digital technologies of Power BI:

BI:

- 1) Data connectivity: Power BI connects to a wide array of data sources, including data bases, Cloud services and web API's. This technology allows live connection to data sources, enabling real time data analysis without importing data into Power BI.
- 2) Data transformation and modeling: Power query editor enables users to clean transform and shape also through a user friendly interface. Power BI provides capabilities for creating relationship and different data tables, calculation column to using DAX.
- 3) Data visualization: Users can create interactive dashboard with a wide range of visualization such as trailer, graphs, tables. This can be customized and tailored to customized and tailored to specify needs.
- 4) Natural language processing (NLP): Q&A A feature enables users to ask questions about the data using natural language and Power BI will generate visualizations based on the queries. This helps users interact with data in a more intuitive way.
